

# Polyclad

## WALLCARE INFORMATION

Polyclad Plus PU • Polyclad Pro PU

The Polyclad range of wall and ceiling coverings are a homogeneous PVC vinyl sheet featuring a subtle marbled decoration with the protection of a polyurethane surface treatment.

The following maintenance instructions are designed to minimise the cost factor, without compromising the long-term appearance of your wallcovering.

### GENERAL ADVICE

- Regular cleaning is more beneficial to the wallcovering and more cost-effective than occasional heavy cleaning
- Always follow the Health & Safety guidance provided and dilute cleaners and detergents in accordance with the manufacturers' instructions
- Do not use strong kitchen detergents on vinyl surfaces
- For recommended products, see the Polyflor Approved Maintenance Products sheet

**AFTER INSTALLATION, INCLUDING WELDING, IS COMPLETED, THE MATERIAL SHOULD BE LEFT FOR 24 HOURS BEFORE ANY CLEANING IS CARRIED OUT**

### DAILY MAINTENANCE

- For light soiling wipe the walls with a damp cloth, using a neutral cleanser diluted to the manufacturer's instructions
- Never use an abrasive pad

### ROUTINE AND PERIODIC MAINTENANCE

- If heavily soiled, especially with grease, wipe the walls with a damp cloth, using an alkaline cleanser diluted to the manufacturer's instructions
- Afterwards, rinse the walls using clean warm water and a small amount of neutralising agent such as acetic acid

### STEAM CLEANING

The Polyclad range of wall and ceiling coverings are suitable for steam cleaning on a periodic basis.

# APPROVED MAINTENANCE PRODUCTS

The companies listed have products that are approved for use with Polyflor products. For full instructions for use, and health and safety guidelines, please contact the manufacturer.
