RSPCA Bury & Oldham Oldham, UK

PRODUCTS USED: Polysafe Mosaic PUR

Polyflor donated Polysafe safety flooring to the new RSPCA Bury & Oldham facility at Strinesdale Country Park, Oldham. The £1.7 million centre has a state-of-the-art veterinary suite and boasts cat and dog 'meet and greet' rooms.

Three shades of Polysafe Mosaic PUR safety flooring were used throughout the building, with various colours being used to indicate different zones. The blue Freshwater shade was installed in the reception, shop, corridors, dog meet and greet room, operating theatre and clinic. The beige Akoya design was fitted in the cattery, upstairs office area and training room.

Polysafe Mosaic flooring in Sunstone was chosen for the isolation rooms where dogs and cats who need to be separated from other animals in the main kennels and cattery for health reasons are kept. Colour coding is used to help RSPCA staff to use the correct cleaning products in each area, for example, the red labelled brooms and mops are only to be used in the isolation areas with red floors. This flooring is robust enough to withstand frequent cleaning with the animal-friendly Anigene disinfectant cleaner which is used at the facility as part of the effective maintenance procedure.

Denise McCabe, Operations Director for the Bury Oldham and District branch commented, "We chose Polyflor's Polysafe Mosaic safety flooring for our new facility as we had some installed in our old centre and found it performed much better than our resin floors. We are delighted with the finished look of the RSPCA Bury & Oldham branch and are very grateful to Polyflor for their generous donation."
