

SPORT67

High performance, heavy duty, multi-use sports floorcovering with a polyurethane reinforcement for low cost, lifetime polish free maintenance.

Polyflor Sport 67 is recommended for use in school and local authority sports halls, gymnasias and leisure centres, where resilience underfoot and long life under heavy traffic are needed. Polyflor Sport 67 meets Sport England requirements and is a multi-use sports floor for general sporting activities including football, netball, basketball, volleyball, tennis and badminton.

FLOORCARE

The following maintenance instructions are designed to minimize the cost factor, without compromising the long-term appearance of your floorcovering. Once the installation is complete, do not traffic for 24 hours until the adhesive has dried and then:

INITIAL CLEAN

- Remove all loose debris
- Ensure that all traces of adhesive are removed from the surface of the floorcovering
- Mop sweep or vacuum to remove dust and grit
- Damp mop with a neutral detergent
- Rinse thoroughly with clean water and remove residue.
- If required, dry buff with a 1000 rpm plus rotary machine fitted with a suitable clean pad

ROUTINE MAINTENANCE

The following recommendations are provided as a guideline, and the frequency can be changed to optimise the appearance.

Daily

- It is suggested that maintenance should be carried out at least once a day and if heavily trafficked more frequently.
- Mop sweep or vacuum to remove dust and loose dirt.
- As required, spot clean to remove stubborn marks with an alkaline cleanser. Rinse and remove residue.
- Damp mop entire area.
- As required, buff to restore finish.

Weekly/Monthly

Assess the appearance of the floor. Undertake the following as required:

- Scrub with a scrubber dryer fitted with a red pad, and using neutral cleanser (pH 7 to 9).
- Rinse thoroughly with clean water and remove residue.
- As required, buff to restore finish.
- Stubborn black marks can be removed by using the centre disc of a scrubbing pad and a small amount of undiluted alkaline cleanser. Place the disc under the sole of the shoe and rub - this gives greater pressure. Rinse the area well with clean warm water and allow to dry.

NOTE: This maintenance regime requires the installation of a robust and effective barrier matting system.

- Cleaners and detergents should be diluted as per the manufacturers' instructions.
- For further information and advice on specific applications, consult Polyflor Customer Technical Services on +44 (0)161 767 1912, or email tech@polyflor.com. Always follow the Health and Safety guidance provided.
- At the date of issue the data presented is correct. However, Polyflor Ltd. reserve the right to make changes which do not adversely affect performance or quality.

REGULAR CLEANING IS MORE BENEFICIAL TO THE FLOORCOVERING AND MORE COST-EFFECTIVE THAN OCCASIONAL HEAVY CLEANING.

APPROVED MAINTENANCE PRODUCTS
