**Midland Orthodontics  
Sutton Coldfield, UK**

**PRODUCTS USED:  
Polysafe Verona PUR**

Polyflor vinyl safety flooring from the high performance Polysafe Verona PUR range gave a fresh new look to Midland Orthodontics dental practice in Sutton Coldfield recently.

Polysafe Verona was specified for the project as the specialist orthodontic practice required a safe, easy to clean and attractive floorcovering that would provide underfoot slip resistance for patients and employees, creating a professional look that complemented the existing décor. The pale blue Skyline 5205 shade was chosen from the subtle and appealing colour palette available in the Verona range to create the desired crisp, clean look.

Specified and installed throughout treatment, circulation and storage areas by Lynex Flooring of West Bromwich, the finished flooring was coved and welded to provide a secure and hygienic finish. In an area which needs to be continually clean, Polysafe Verona has a cross linked and UV cured polyurethane PUR reinforcement to facilitate a simple maintenance regime.

Lucy Upton, Practice Manager at Midland Orthodontics, commented, "It is crucial that the treatment rooms and clinical areas convey a positive and professional image to our customers, providing a welcoming feel that puts them at ease. Polysafe Verona is the perfect choice for our practice as it combines the look of a highly attractive decorative floor with safety properties for added reassurance, particularly required when laid near to the sinks in the treatment areas"
