Bruyère Saint Louis Residence Orléans, Ottawa

PRODUCTS USED:
Expona Commercial PUR

Expona Commercial luxury vinyl tiles from Polyflor Canada were selected for a dining room renovation project at the Saint Louis residence in Ottawa, which is part of the Bruyère chain of long term care homes.

Located on the scenic banks of the Ottawa River, Saint Louis is a 198 bed long term care home which provides 24-hour-a-day nursing care, occupational therapy and specialized care for patients with dementia amongst many other services.

Installed by Lamont flooring contractors, 1620 square feet of Expona Commercial LVT in the Grey Pine design has given the dining room at the care facility a brand new look.

Expona Commercial flooring is hardwearing and easy to maintain, making it for ideal for high traffic areas of care homes, such as dining rooms which are used a number of times daily by residents and staff.
