

Leadership in Energy & Environmental Design (LEED®) is a sustainable building certification programme that rewards best-in-class building strategies and practices. Stringent criteria are set which a building project must meet to achieve LEED® certification. In doing so, specifiers will seek to use the most sustainable options available for the project.

There are four levels of certification available:

Certified	Silver	Gold	Platinum
40-49	50-59	60-79	80+ points

Polyflor can contribute to points on a LEED® project. The number of points achieved throughout the entire build establishes the level of LEED® certification for that project.

In 2017, the top 10% of LEED® certified companies achieved a Platinum rating, with 44% certified companies achieving a Gold rating; 30% achieved Silver and 14% obtained a Certified rating. Today there are more than 96,000 LEED projects in 167 countries and territories.

## How Polyflor can contribute on a LEED® project

### Materials & Resources

**MR Credit:**

**Construction and Demolition Waste Management**

Polyflor is 100% recyclable and post-consumer waste, including offcuts and smooth uplifted waste can be recycled. Alternatively, our Expona Simplay, Secura and Designatex can be reused as they do not require adhesive for installation.

The Recofloor scheme (of which Polyflor is a founding and funding member) complies with site waste management legislation and diverts vinyl flooring waste (offcuts and uplifted) from going to landfill. Recycle or salvage 50% of the waste for 1 point, or 75% for 2 points.

**MR Credit:**

**Building Product Disclosure and Optimisation  
Sourcing of Raw Materials (Bio-based Content)**

Polyflor flooring contains up to 85% sustainable materials and uses bio-based ingredients. **1 point available.**

**MR Credit:**

**Building Product Disclosure and Optimisation  
Environmental Product Declarations.**

Polyflor can contribute to the LEED® credit through its product-specific environmental product declaration (EPD), which can provide **1 point**; or **0.5 points** for a generic EPD.

**MR Credit:**

**Building Product Disclosure and Optimisation  
Sourcing of Raw Materials (Recycled Content).**

Polyflor flooring contains up to 40% recycled material, which typically includes post-consumer waste from the project site as well as pre-consumer (or post-production) waste, including process and sampling waste for instance. **1 point available.**

### Indoor Environmental Quality

**EQ Credit:**

**Low Emitting Materials  
Option 1, Product Calculation CDPH Compliant  
Option 2, Budget Calculation CDPH Compliant**

Polyflor can contribute to both options of this credit through certification of its low emitting products. VOC certification is available via Indoor Air Comfort, Indoor Air Comfort Gold and FloorScore® certification (Polyflor's certificates are available online at [www.polyflor.com](http://www.polyflor.com), [www.eurofins.com](http://www.eurofins.com) and [www.scs-certified.com](http://www.scs-certified.com)). Along with other materials used on the project, Polyflor products can contribute towards **1-3 points.**

For quick referencing and ease of specification, Polyflor has LEED® Points PDFs available digitally, across all product ranges. Request via [info@polyflor.com](mailto:info@polyflor.com) or speak to our Customer Technical Services Department on **+44 (0)161 767 1912.**
