

Responsible Sourcing

Responsible Sourcing includes social, ethical and environmental factors and how they are considered throughout the supply chain and design process. This is an important aspect of a product's life cycle, involving strong organisation and leadership, compliance, and solid relationships.

Responsible Sourcing is defined in BS8902 – Responsible sourcing sector certification schemes for construction products – Specification as: 'The management of sustainable development in the provision or procurement of a product.' Sustainable development is further defined as: 'An enduring, balanced approach to economic activity, environmental responsibility and social progress.' **Source: www.greenbooklive.com**

How We Source Responsibly

Polyflor is certified to and rigorously audited on all aspects of responsible sourcing. Following on from our Quality Management System (QMS) ISO 9001, we achieved ISO 14001 in 2000. This sets out the criteria for an Environmental Management System (EMS) and maps out a framework for a company to follow in setting up an effective EMS. All environmental aspects, including the supply chain, are considered.

Most recently production achieved BES 6001 for responsible sourcing, and SA 8000 for decent and socially acceptable practices in the workplace.

What is BES 6001?

The BES 6001 standard, from BRE Global, is a means of securing certification to demonstrate through independent, third-party certification, that products certified against the scheme have been responsibly sourced. BES 6001 does not focus on a company's site, but products or ranges manufactured at one or more sites.

BES 6001 is a framework standard for Responsible Sourcing which sets out requirements under three main headings: Organisational Management; Supply Chain Management and Environmental and Social Responsibility Management. To meet the standard, companies must satisfy certain compulsory elements. Additionally, there are higher levels of compliance that can result in a higher performance rating being awarded.

Depending on a company's performance against the criteria, ratings are awarded on a Pass; Good; Very Good and Excellent basis. **Polyflor sets the bar high, having been the only certified floor covering manufacturer to achieve an Excellent rating for Version 3 of the standard.** By achieving Excellent, Polyflor has satisfied the compulsory sections and conforms to the highest levels of compliance, which has been a massive undertaking for the company - involving production, all other internal departments and its supply chain. Certification is available on www.greenbooklive.com.

The Importance of BES 6001

The UK Contractor's Group (representing over 30 leading construction companies who together account for a third of the UK construction industry turnover) state that: 'UKCG members support and give preference to procuring products which are able to demonstrate compliance with a recognised responsible sourcing scheme, certified by a third party.'

BES 6001 is just that. It is an increasingly important and valuable standard for customers who are looking to procure flooring with sound environmental credentials and traceability, from socially aware and ethical suppliers. Without doubt, the standard can help customers make better informed decisions when selecting suppliers.

The hard work and challenges set out by the BES 6001 framework has driven us to scrutinize our own supply chain more than ever before with greater commitment to using trusted, local suppliers who are ISO 9001 and ISO 14001 certified. Additionally, stringent and demanding environmental objectives have been set and managerial procedures and policies improved.

BES 6001 has also given Polyflor more direction with regards to social responsibility management – with a focus on internal procedures regarding employees, as well as how the company engages with our local communities and stakeholders in general.

Furthermore, the use of Polyflor products with BES 6001 certification and individual BRE ratings can potentially contribute significantly to the available points in section MAT 03 of a BREEAM Assessment. Where many companies typically contribute 1 point through an environmental management system such as ISO 14001, Polyflor can provide an additional 3.5 points for its BES 6001 Excellent certification. For more information on this, refer to the 'Maximising BREEAM Credits with Polyflor' pages in this document. BES 6001 also secures additional credits within the Code for Sustainable Homes.

The Vinyl Council of Australia Product Stewardship Program

Polyflor Australia is a signatory to The Vinyl Council of Australia Product Stewardship Program. This programme has voluntary commitments focused on Best Practice Manufacturing, Safe and Sustainable use of additives, Energy and Greenhouse Gas Management, Resource Efficiency and Transparency and Engagement. The commitments ensure that the entire process from raw materials through to end of life of vinyl products is reviewed and addressed to minimise environmental and safety issues within the vinyl industry, on a local and global scale. Visit www.vinyl.org.au/sustainability/stewardship

"The ultimate goal of sustainable sourcing is to build strong, long-term relationships with suppliers. Improving performance on environmental, social and ethical issues is vital to developing such relationships."
