

The Propeller Bar & Grill

Affinity255 Luxury Vinyl Tiles launch The Propeller Bar and Grill into 1960s with stylish nostalgic finish. Ark Interior use a selection of shades from the Affinity255 collection offering durability and easy maintenance.

Location: North Lincolnshire

Products Used: Affinity255

Sector: Leisure & Hospitality

Delivering a luxurious and bespoke design, Ark Interiors, were able to create a high-end bar and restaurant setting for staff and customers to enjoy at The Propeller Bar & Grill, Humberside Airport. Their objective, to provide a nostalgic 1960s aircraft impression in keeping with the history and location, was enhanced with the installation of Polyflor's Affinity255 in the shades Dappled Oak, Flamed Chestnut and Seasoned Grey Oak.

Affinity255 was the ideal choice for the project that combines nostalgic features with a contemporary finish. This beautifully engineered collection of high design luxury vinyl tiles is developed for heavy traffic environments and is an eclectic mix of authentically reproduced wood plank designs, incorporating contemporary and recycled timber patterns. The innovative 2mm gauge allows Affinity255 to be installed alongside 2mm vinyl sheet flooring, providing a seamless flooring solution that flows throughout any commercial installation.

Fitted throughout the entrance, main restaurant and bar areas Affinity255 makes the perfect addition, ideal for heavy commercial interiors, the rustic and contemporary timber designs are ideal for the leisure sector, developed and presented in a practical, resilient and hygienic product construction. Encompassing tan and honey tones in a smooth, oak plank pattern, the Dappled Oak shade enhances any commercial interior from entrances and boutique cafés to healthcare installations and retail stores. The versatile base colours of Seasoned Grey Oak can be paired with other aged, reclaimed materials for a time-honoured look, or modern woods and concretes for an industrial effect. With Flamed Chestnut, although bold in design with dominant knots, the inclusion of soft yellows, oranges and pale taupe shades within each plank creates a comforting look that works beautifully laid in a design floor.

To further enhance the floorcovering, Affinity255 features a high-quality, cross-linked polyurethane reinforcement providing a low cost, polish free maintenance regime. 100% recyclable and achieves BRE A+ certification for major use areas. Making the collection environmentally preferable whilst meeting decorative, practical, budgetary and maintenance objectives.
