

Aegis Health Medical Centre

For this modern medical centre, a colour scheme was required that evoked the neighbouring coast to welcome patients and provide an ocean-like calm. To enhance well-being, flooring from Palettone PUR helped create a design tonic, brightening the impressive interior of the building.

Location: Murdoch, Perth, WA

Products Used: Palettone PUR, Polyclad Plus PU

Sector: Healthcare

Located in the suburbs of Perth, Western Australia, Aegis Health Medical Centre provides healthcare services to residents, alleviating pressure on the nearby emergency department.

Perfect Practice, based in the city centre, undertook architectural design responsibilities. Darcy Miller, the appointed company designer, led the decision-making process.

Miller opted for an ocean theme, inspired by its turquoise waters and additional coastal colours which, when combined, created an immense sense of calmness.

Practical, low-maintenance benefits, alongside a hygienic finish, were significant considerations within the large waiting area and reception space.

After careful consideration, Miller selected the following shades:

- Palettone PUR – Natural Cotton (8621)
- Palettone PUR – Aqua Pura (8651)
- Palettone PUR – Pennyroyal Mint (8652)
- Polyclad Plus PU – Summer Sky (2830)

This palette of soothing shades was used to create zones within the waiting and treatment areas.

The result is a truly impactful experience for patients visiting Aegis Health Medical Centre, offering welcome comfort and serenity at all stages of their visit.

“ We are proud to have been a part of this excellent project for Aegis Health Medical Centre.

Polyflor’s Palettone PUR shades have been beautifully incorporated into Darcy’s design and exceptionally installed by Manchester Flooring Solutions.

Together, we’ve created a space that truly cares and creates a soothing, welcoming yet modern and functional health care environment.
