

JOB OPPORTUNITY

FULL TIME ENGINEERING MACHINIST WHITEFIELD

JOB DESCRIPTION

The Role:

Polyflor is currently seeking a qualified and experienced Engineering Machinist to join our on-site engineering team in Radcliffe. This hands-on role is essential to supporting production and maintenance by manufacturing components, setting dies, and carrying out key machining tasks to keep plant operations running efficiently.

Duties:

- Operate a range of machinery including manual lathes, milling machines, radial drills, and vertical/horizontal machines.
- Manufacture and modify parts to support breakdowns, preventative maintenance, and project work.
- Set and adjust dies for both manual and automatic presses.
- Perform blade grinding using a surface grinder to precise tolerances.
- Read and interpret technical drawings to ensure accurate machining.
- Work closely with engineers and supervisors to prioritise tasks and minimise downtime.

JOB TYPE

Hours: Full Time - Permanent - 40 hours per week

10 hour shifts: 07:00 - 17:00: Monday - Thursday / Tuesday - Friday

Supplementary pay types: Monthly attendance bonus

EXPERIENCE

- Apprenticeship-qualified machinist (or equivalent experience).
- Strong background in manual machining, particularly milling and lathe work.
- Experience operating radial drills and vertical/horizontal machines.
- Preferred experience in die setting for both manual and automatic presses.
- Competence in blade grinding using surface grinders.
- High attention to detail and a safety-first, methodical approach.
- Flexible team player with a proactive attitude.

CLOSING DATE

5th September 2025
